Explanation

`^` asserts position at start of a line ⓘ

`\$` matches the character `$` with index `3610` (`448` or `2416`) literally (case sensitive)

✓ Match a single character present in the list below `[0-9]`

`+` matches the previous token between **one** and **unlimited** times, as many times as possible, giving back as needed (greedy)

`0-9` matches a single character in the range between `0` (index `48`) and `9` (index `57`) (case sensitive)

✓ 1st Capturing Group `(\.[0-9]{2})`

`?` matches the previous token between **zero** and **one** times, as many times as possible, giving back as needed (greedy)

`\.` matches the character `.` with index `4610` (`568` or `2E16`) literally (case sensitive)

✓ Match a single character present in the list below `[0-9]`

`{2}` matches the previous token exactly **2** times

`0-9` matches a single character in the range between `0` (index `48`) and `9` (index `57`) (case sensitive)

`$` asserts position at the end of a line ⓘ
